PROSPECTUS FOR 1866.

The new year upon which we are about o enter will usher in an era of national

rowth, prosperity and greatness unexam-led in the history of the world. After ur years of desperate conflict, the principles which the LEADER, in common with country, has always announced and de-fended, have triumphed, and the war for the Union and Freedom has ended in victory and peace. Secession and slavery have both been crushed, and our Republic, re-united and regenerated, enters upon a new and glorious career. The future is full of the promise of greatness to our nation and of prosperity to its citizens. And yet the crisis of our danger is not passed. The contest has only been trans-terred from the military to the political arena. The weapons are ballots instead of bullets, the pen instead of the sword. The spirit of secession is yet alive. The great work of reconstructing the relations of the Southern States to the Union, so that the nation may be made secure, its faith and honor kept inviolate, and equal rights to all its citizens guaranteed, is yet to be performed—a work which for its immense importance and gigantic diffi-culties is only paralleled by that which we have just concluded. In this most cri-tical and important period—in the midst of these great events—no man, rich or poor, can afford to be without a newspaper. It is an article of prime necessity in every household. Without it a man is

half a century behind the age.
